(Continued from page 1.)

to refer the claim to the next Legislature.

Kaulukou: "I thought that was why we are here now. We are taking the place of the Legislature."

Jones moved that the report be adopted.

Gear: "In regard to the Zerbe matter, my attention has just been called, by one of the judges who sat on the case, to the fact that they considered the case was a very meritorious one. That Zerbe did all the work of two people at one time, and considered that remuneration should be given him for his work. As chairman of the Committee of Interior, I will say that the committee, in considering unpaid bills for 1899, found many not half so meritorious. If it is a matter of public interest that these unpaid bills be paid, it seems to me just as much a matter of interest that payment should be made to other persons who have not received their money. It appears to me this is a matter which should not be put off any longer. If the only reason for not paying it is that it is not a proper matter for this Council to pass, then I think we will have to cut out about two-thirds of what we are considering. I move that the claim be taken up with the appropriation bill, Act 3." Carried.

The Committee on Foreign Affairs, by Mr. Robinson, reported items 21A, 21B and 21C for expenses of Hawaiian Consulate, San Francisco, amounting to \$176, unpaid bills for December, and recommended they be inserted in the appropriation bill.

Moved by Robinson that the report be laid on the table and taken up with the appropriation bill. Carried.

Chairman Gear read the report of the Committee on Interior Department, Act 3.

Isenberg moved the report be laid on the table and considered in connection with the bill. Carried.

Chairman Gear then read the committee's report on Interior Department covering items in Act 4. The chairman moved that the report also be laid on the table and taken up with the appropriation bill. Carried.

Under unfinished business, the Council then took up line 65, Act 2, Honolulu Fire Department, \$41,464.

The committee report upon this item was to increase it to \$66,164.

Achi moved that the report of the committee be amended by inserting Palama for Kalihi where the word occurs in the recommendation for a fire station in that district.

Jones did not see the use of the item of \$4,500 for a hook and ladder truck, stating that the big buildings are, or ought to be, constructed so the use of ladders will not be required. "It may be I am a little prejudiced against the hook and ladder business," said he, "but some will remember that I was a member of the volunteer hook and ladder company organized here about forty years ago. Well, we were, of course, always first at the feast, but made a fizzle of the fire. We had a banner presented to us by some ladies as a mark of esteem for our valor. I was very instrumental in getting the banner presented to the boys. After that I sent in my resignation, but nothing was done with it and finally they expelled me for non-payment of dues. Therefore, you may think I am a little prejudiced. It seems to me if we strike out the item of \$4,500, we will save something. I move that this item pass at \$61,664."

Not: "We haven't got a ladder fit to put on a hen-coop. I consider the hook and ladder truck a necessity. I move the adoption of the committee's report."

Robertson: "I think I know how some money can be saved. If an amendment is made so that the item for a new fire engine house for No. 1 will read 'for Palama,' I think it would be a move in the right direction. There is not sufficient either, except in a few places, for the mere attachment of a hose to the hydrants, to reach any distance. I therefore move an amendment by striking out the item for a new station house and insert the \$12,000 item for Palama."

Isenberg: "We have in this bill, and in bill No. 4, recommendations for improvements in the water system. It should be done. People are living in Nuuanu valley who have to go four or five days without water. A house burned down there and when the engines got there, there was not a drop of water. The government ought to pay for that loss. We have got a chance to do something now, so let's do it. I am in favor of passing the bill according to the committee's report. The improvements in the water system include Nuuanu, Kalihi, and Waikiki and I am told there will be a pressure of 125 pounds, enough to supply a hose without an engine."

Allen: "I would like to explain that our object in recommending the three hose carriages and accompaniments, was this: We recommended one for Nuuanu, one for Kalihi or Palama and one for Waikiki. The Water Commissioner assures us that with the new pumping station at Kalihi and an addition of seventy-five hydrants there will be pressure enough to do the work of a steam engine. I consider these three hose wagons and extra hydrants very necessary."

President Dole put the motion to pass the item as reported by the committee, namely, \$66,164, with the amendment proposed by Achi to change Kalihi to Palama. Carried.

Robertson moved that line 84, Act 2, repairs, furniture, etc., for government buildings, \$7,000, be taken up.

Robertson renewed his amendment of the preceding session to make the item read, repairs, etc., for the Judiciary building.

Jones moved the item pass as in the bill.

President Dole put the original motion to strike the item out of the bill. Motion lost.

Motion put that the item be amended to read repairs to Judiciary building. Motion also lost.

Motion that the item pass as it appears in the bill. Carried.

Adjourned at 5 p. m.

Hives are a terrible torment to the little folks, and to some older ones. Doane's Ointment never fails. Instant relief and permanent cure. At any chemist's, 50 cents.
